

TASK A

Sun Pharmaceutical Industries Ltd. is India's largest pharmaceutical company and one of the world's leading specialty generic pharmaceutical manufacturers. The company develops, manufactures and markets generic medicines, specialty pharmaceuticals, active pharmaceutical ingredients (APIs), and consumer healthcare products. It operates through a vertically integrated business model with a strong presence in both domestic and international markets.

Sun Pharma maintains a global presence in **over 100 countries** across **six continents**, including Asia, North America, Europe, Africa, South America, and Australia/Oceania. Its operations are supported by **more than 40 manufacturing facilities** strategically located in India, the United States, Canada, Israel, Europe, and key emerging markets.

Major Competitors(Domestic):

Cipla

Dr. Reddy's Laboratories .

Lupin

Aurobindo Pharma

Zydus Lifesciences

Torrent Pharmaceuticals

Task B

Company	Include?	Reason
Cipla	Include	Large Indian pharmaceutical company with a strong presence in generics, branded formulations, and international markets. Similar scale and business model to Sun Pharma.
Dr. Reddy's Laboratories	Include	One of the closest peers. Strong US generics business, global operations, and similar product portfolio.
Lupin	Include	Significant generic medicines business with domestic and international operations, making it a suitable comparable.
Aurobindo Pharma	Include	Strong in APIs and generic medicines with a large export business. Similar manufacturing-focused business model.
Zydus Lifesciences	Include	Diversified pharmaceutical company with generics, specialty products, and international operations comparable to Sun Pharma.
Torrent Pharmaceuticals	Exclude	Good Indian pharma company but more focused on branded formulations and cardiovascular therapies. Slightly less comparable than the first five due to its different business mix and smaller international presence.
